

TECHNO WEIGH SYSTEMS PVT. LTD.

PLANT AUTOMATION

PLANT AUTOMATION

- Techno Weigh Systems offers Automation solutions for different industries. We provide automation of complete plants or machineries.
- We have supplied automation systems to most of the large animal feed plants in India.
- We have engineers working on system design, detailed engineering and installation and commissioning.
- We have in-house facility for PLC panel building and programming.
- We have undertaken various projects involving PLC, HMI and SCADA.
- Strict quality control exists right from the design stage, during panel fabrication, assembly and wiring stage to the software development stage and during testing and acceptance.
- We have installed more than 2000 Input/output based full automation control system.
- We are also providing Site support in the form of Supervision of installation, integration of hardware and software as also the commissioning support.
